## GLOBAL PRESS RELEASE

### THE NEW WORLD TRADE CENTER 2002 – THE DREAM TO REALITY

My name is Derek Turner: I am a private, international, index trader based in The Bahamas and the nature of my business does not permit me to indulge in undue emotion. However, the terror and the trauma of September 11<sup>th</sup> tragedy has moved me more deeply than I can ever express.

Along with the rest of the civilized world, I witnessed the horror and the senseless destruction of the World Trade Center. Together, with my attorney and our wives, we traveled to New York on February 15<sup>th</sup> 2002 to pay our respects at Ground Zero.

The emotion we felt at the scene of the disaster has and continues to profoundly affect us.

I heard the cries of my fellow traders as some took their lives and fell from the Twin Towers, I heard the voices of the doomed fire fighters, policemen, rescue workers and all those human beings who were innocent victims of this heinous crime.

I read, with tear filled eyes, the simple, moving and heart felt memorials written on the wooden fences and hoardings at Ground Zero and felt the soulful loss of the families and friends of those who died.

I was and will remain indelibly marked by this awful and appalling tragedy. Each issue of The New York Times – A Nation Challenged – Portraits of Grief reminds me of the lives of those who were taken from us.

On the night of the 16<sup>th</sup> of February 2002, in my New York hotel room, I fell into an uneasy sleep and awoke at 4.20am in the morning of the 17<sup>th</sup> with a crystal clear vision and an overwhelming compulsion of what must be done to rebuild The World Trade Center. I felt the need to show the world the spirit and resolve of the American people and honor those who died on 9/11.

I have worked relentlessly and devoted my energies and resources in an effort to convey the image of my vision to the world.

My resolute conviction is that we must build back a bigger and better World Trade Center.

*I would like to quote from Daniel H. Burnham, one of Americas greatest architect's, **Who said:***

***Make no little plans; they have no magic to stir men's blood...***

***Make big plans, aim high in hope and work.***

I believe that we must not bow to the evil that men do and we owe an overwhelming debt of honor to our fallen comrades.

I also believe that I have heard the message from the people of New York and other great cities and towns of America. This resounding message from the heartland of the USA, and around the world, is that we will not be intimidated or silenced by evil-doers. We will not whimper in political correctness. On the contrary, we will demonstrate our faith in a design and structure even more dynamic than before, not only in memory of those whom we have lost, but to re-state our own beliefs in the future of the new millennium.

Those with whom I have shared my vision and who have seen the graphic images of The New World Trade Center have responded with universal emotion and intellectual support.

I wish to quote from The Bible : **Matthew C7 V 7/8**

**Ask, and it will be given you; search, and you will find; knock, and the door will be opened for you.**

**For everyone who asks receives, and everyone who searches finds, and for everyone who knocks, the door will be opened.**

My vision is for an all encompassing structure, which in addition to housing the prime financial and institutional workspace for America and the world, will also accommodate residential, commercial, cultural and recreational functions, within a technologically advanced and environmentally integrated unity of function, form and facility.

I call it a Cyber City,.....Where people will live, work and are entertained in a secure super structure.

I dare to dream of the future and to challenge the ingenuity of our best architects, engineers, environmental planners and designers to rise to put their inspirational creativity into overdrive .

I wish to embrace the symbolism of all the world's cultures in the realization of this dream and to include the mystical geometry of the spheres, the pyramid and a bio-sphere in this unparalleled architecture for The New World Trade Center, thus creating the Worlds Tallest Building, for the greatest city in the World, and, for the people of the World.

We will plant and nurture 2833 trees in the landscaped floor of the biosphere as a living memorial to all those we lost on 9/11. These trees will flourish in the great domed bio-sphere to be named WTC Memorial Park.

Freedom is a symbol of being human and, I believe, that global support for this vision is overwhelming. I ask for the help of all those who care, as do I, in endorsing this vision, and encourage you to give me your support via our web site [wtc2002.com](http://wtc2002.com).

Allow us, to realize our dream for a bigger and all embracing New World Trade Center for which our planet can justly be proud.

The re-building of The New World Trade Center will re-vitalize our economy and this structure will pace the heart beat of America. As it re-builds, let it breathe new life into our soul, into a new wave of great global prosperity.

My last quote from The Bible : **Matthew C5 V 14/15/16** *could have almost been written for The City Of New York*

**You are the light of the world. A city built on a hill cannot be hid.**

**No one after lighting a lamp puts it under the bushel basket, but on the lampstand, and it gives light to all in the house.**

**In the same way, let your light shine before others, so that they may see your good works and give glory to your Father in heaven.**

I propose, with your help, that a ground breaking ceremony occur at 8:48am, 9/11/2002.

**Thank you for your support for the lost souls of 9/11, 2001  
which will crystallize my dream into reality**

---

**Derek G. Turner**

## The WORLD TRADE CENTER 2002

by

**Turning House Enterprises**

Nassau, Bahamas

A visionary concept, conceived at 4:20am on the 17th of February, 2002, whilst in Manhattan, for the resurrection and replacement of the World Trade Center Complex in New York City, which was tragically destroyed on 11<sup>th</sup> Sept. 2001.

Mr. Derek Turner's vision is an unequivocal "turning of the other cheek," a powerful statement of his Spiritual faith and belief that the message of resurrection is not only redeeming but more vital and more dynamic than before.

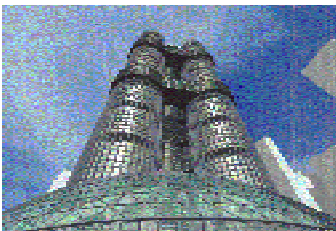

Mr. Turner wants his sun to rise on the evil and to build back that which was, even bigger and better than the venerable Twin Towers designed by Yamasaki, thus initiating the catalyst for the New Economy. A design and structure befitting the new millenium.

The Twin Towers were 1320 feet high. Mr. Turner proposes to raise the structures to a height of 1449 feet, which, with the communications tower will create the world's tallest building at 1750 feet.

The concept is of 4 cylindrical towers topped by an 11 storey pyramid, arising from an enclosed, transparent, climatically controlled, landscaped biosphere. A fifth, (central) core of high speed elevators is linked to the towers by transit levels every 10 floors and two 7 storey hydroponically landscaped galleries unify the massive aerial structures at the 45<sup>th</sup> and 75<sup>th</sup> floor levels. The 5 circular floors atop the towers will include 2 revolving restaurant floors which are capped by an 11 storey pyramid, boutique hotel (a Hyatt-in-the-sky).

A total of 111 floors above the sidewalks of Lower Manhattan

The below-grade service areas and subway lines will extend under the entire site, above which, within the domed enclosure of the Biosphere, will be commercial, residential, entertainment and related functions including convention facilities, concert halls, and recreation areas.

Within the Biosphere there will be a memorium dedicating these towers to the lost souls of 911.

The following vital statistics emerge from Mr. Turner's vision for the New World Trade Center:

**Building Height**

Top of Towers	= 1237.5 ft
Top of Pyramid	= 1449 ft
Top of Mast	= 1750 ft
Total Floors (above street level)	= 111 Floors

**Floor Areas**

Per Tower Floor	= 31,416 sf
All 4 Towers x 81 floors	= 10,178,784 sf
Per Tower Diameter	= 200 ft

Gallery Floors (area)	= 163,000 sf
Gallery Floors (x 14)	= 2,282,000 sf

Central Tower (typ)	= 11,310 sf
Central x 94 floors	= 1,063,115 sf
Central Tower (upper)	= 57,255 sf
Central x 5 floors (upper)	= 286,275 sf
Central Diameter (typ)	= 120 ft
Central Diameter (upper)	= 270 ft

Pyramid Floor Space (11)	= 350,000 sf
--------------------------	--------------

**Biosphere**

Dome Height	= 220 ft (above street level)
Dome Diameter	= 800 ft
Dome Area	= 640,000 sf (gross)
Dome Acreage	= 14.7 acres (gross)

**Below Grade**

A Maximum of Seven (7) Floors Below Street Level
